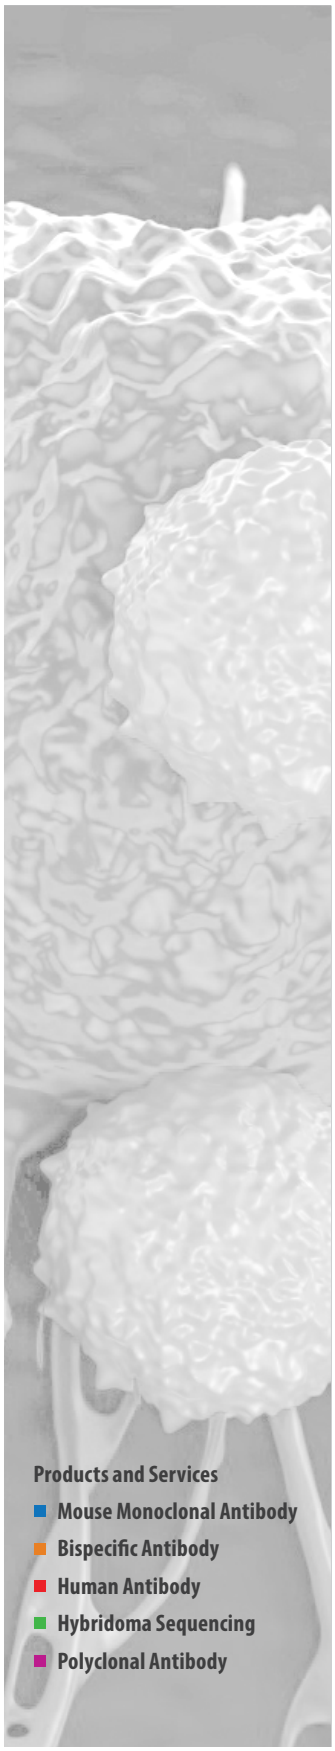
ProMab Biotechnologies, Inc.

RECOMBINANT NUCLEOCAPSID PROTEIN (HIS TAG)

PMC-842

Ready-to-use Recombinant Proteins



Products and Services

- Mouse Monoclonal Antibody
- Bispecific Antibody
- Human Antibody
- Hybridoma Sequencing
- Polyclonal Antibody

Promab Biotechnologies' new product development programs are being designed for COVID-19 research and development.

Order Information

Catalog#	Size	Price
PR40006	100ug	$399

Description

The nucleocapsid protein is a structural protein that binds to the coronavirus RNA genome, thus creating a shell/capsid around the enclosed nucleic acid. The nucleocapsid or N protein (amino acids 1-419) was designed with a His tag.

Specifications

Gene ID	MN908947.3
Expression Host	HEK293 suspension cells
Species	Human
Molecular Weight	~55 kDa
Sequence	1-419aa
Formulation	Sterile PBS
Purity	>95% visualized by SDS-PAGE under reducing conditions
Storage	Store at -20°C to -80°C. Avoid repeated freezing/thawing cycles. Thawed protein can be stored at 4°C for a limited period of time.

Application

SDS-PAGE, ELISA, WB, other biochemical assays such as high-throughput screening of small molecule drugs, antibodies, phage display assay.
